Event highlights

CERA Global Risk Conference

This week the CERA Global Association (CGA) is welcoming all actuarial risk experts to the CERA Global Risk Conference. After a strong response to the call for presentations, the CGA has pulled together an exciting and varied program which will be of great interest to CERA holders and actuaries with an interest in ERM, as well as other risk professionals around the world.

The first three days have shown 6 live sessions on the full scale of risk management topics, plus another 10 on-demand presentations.

<p>Voting paradoxes for pension funds Matthew Glass</p> <p>Explore more</p>	<p>Engaging with climate related risk Neil Cantle and Amy Nicholson</p> <p>Explore more</p>	<p>Risk Management Practices during a Pandemic Doune Connert and Deniz Surmengen</p> <p>Explore more</p>
--	--	---

[Watch all presentations](#)

Today the conference has its finale with a 9-hour live-stream on actuviv. Tune in from 9am BST / 10am CEST to follow the insights of seven high-profile experts such as keynote speaker Vishesh Gosrani and the presentation from RGA's Neil Parkin.

Microinsurance: Market Trends and Opportunities

Ola Oyekan, Ph.D., Microinsurance, Mass Market Specialist, RGA

Join Ola Oyekan, Ph.D., Microinsurance Specialist with RGA, as she explains how and why the microinsurance market has grown significantly over the last decade. The landscape for this product is being redefined by insurtech and other factors, resulting in the expansion of insurance coverage not only to low-income individuals in emerging markets, but also to underserved customers in developed markets. Microinsurance is a global opportunity for the industry, and this presentation will provide some useful insights on the business.

Events

EAA e-Conference on Data Science and Data Ethics

The actuarial focus has changed significantly over the last couple of years. Computational power is increasing with exponential growth, even as more and more data is available. This combination puts the actuarial profession into a position where a new understanding has to be developed on today's possibilities of actuarial science and its ethical implications.

The EAA is delighted to offer all interested actuaries and other experts a forum for knowledge exchange: On 29 June 2021, the second EAA e-Conference on "Data Science & Data Ethics" will take place live and virtually.

The program combines keynote speeches with food for thought from well-known experts, as well as selected talks from professionals through a Call for Papers. You can book your ticket to the live program here on the [EAA website](#). Additionally, you will be able to access four high-class recorded sessions on actuviv from 29 June 2021, free of charge:

- "Building Trust in A Government's Use of Algorithms", Gráinne McGuire (Taylor Fry)
- "Extension of Classical Data Science Tools by Text Mining for Claims Classification and Reserving", Benedikt Funke (Oliver Wyman)
- "Lifestyle Mortality & Underwriting: The Data, the Science and the Ethics", Petr Václav / Jacqui Niehaus (RGA)
- "Survival Analysis & DataOps", Razvan Ionescu / Antoine Chancel (SCOR)
