

## Greetings,

In this month's newsletter we are happy to share recordings from two major events with you: the European Actuarial Academy (EAA) e-Conference 2021, and more than 250 short presentations from the first virtual Insurance, Mathematics, and Economics (IME) conference. Brush up on your CPD with these compact recordings on all actuarial trends from around the world. Moreover, we are very happy to welcome our colleagues from Nigeria and the Philippines to the actuviv community. Finally, we have an interesting interview from our partner platform actupool about how to become an actuarial leader.

## Event highlights

### EAA e-Conference on Data Science & Data Ethics 2021

On 29 June 2021, the second EAA e-Conference on Data Science & Data Ethics took place both live and virtually. The program featured a lot of food for thought, ranging from keynote speeches from well-known experts to selected talks from professionals through a Call for Papers.

All 12 presentations, including two first-class keynotes by Maximilian Poretschkin (Fraunhofer-Institute IAIS) and Ronald Richman (SA Taxi) are available to actuviv users on the [event page](#).

## IME 2021

The theme of the very first virtual IME conference was "United As One", and was jointly hosted internationally by four universities: the University of Illinois Urbana-Champaign, and the Pennsylvania State University, from the United States; Ulm University in Germany; and the University of New South Wales (UNSW Sydney) in Australia.

This was one of the biggest conventions of the year, and actuviv is sharing more than 250 15- to 20-minute presentations on the latest trends in actuarial science and practices. Have a look at the comprehensive program and find your quarter hour of CPD.

### Latest webcast from actuviv partner RGA

RGA, one of the world's largest life and health reinsurers and actuviv's platform sponsor, regularly publishes webcasts on current topics on actuviv.

**Eldercare and Aging – Insights and Opportunities**  
by Anil Sanwal, Vice President, Business Initiatives, RGAX

Our global population is aging rapidly, bringing with it both challenges and opportunities. Accompanying this demographic trend are advances in data sources that were previously not utilized.

A specific focus on dementia warrants further attention, as this grouping of medical conditions places a significant burden on families and payors (both private and public), as well as society at large. Technology and data analytics now allow us to better understand the genesis of dementia and how it advances, and provides the opportunity to take earlier action in managing this condition among the aged. In turn, this fosters "aging in place", benefiting the elderly, their caregivers, and payors.

## News from actuviv

**Community**

**Welcome to our colleagues from Nigeria and the Philippines**

The actuviv community is constantly growing: this month, we are very happy to welcome the actuaries from the Nigerian Actuarial Society (NAS), and the Actuarial Society of the Philippines (ASP). A total of 300+ members from both associations now have unlimited access to the full actuviv archive until the end of 2021.

**Events**

**Diversity of Thought - the next episode**

After seven successful discussions with high-ranking actuaries from around the world, the "Diversity of Thought" series goes into the next round. Lesley Traverso (Talent Insights), Glenn Hellemeur (CAA) and Cathy Lyn (CAA) discuss how to generate actuarial growth and gain more clients in other industries.

Join the 8th episode with the motto "Actuaries Reach Out" on Zoom on 26 August 2021, 5:00 PM EST. You find the free registration [here](#).

**French insights on actuviv**

In June, the Institute des Actuaire invited its members to the CAP ACTUARIAT, the first 100% virtual forum of the French actuarial community. It brought together professionals, future professionals, companies and academics around the theme "Actuarial and resilience".

Now 22 sessions of the CAP ACTUARIAT are available to all actuviv users.
